

Certified Kubernetes

Administrator (CKA)

Sample Curriculum Path

If you're interested in becoming a **Certified Kubernetes Administrator (CKA)**, you may consider following the curriculum path below. Depending on experience level, with these resources and additional research, study, and practice, you can earn your certification in 3-6 months.

Start by enrolling in these free courses:

FREE

Introduction to Cloud Infrastructure Technologies LFS151

FREE

Introduction to Kubernetes LFS158

Then consider intermediate training:

Containers Fundamentals LFS253

Increase your chances of becoming certified on the first try by taking:

Kubernetes Fundamentals LFS258 OR
Kubernetes Administration LFS458

Finally, register and sit for your exam:

Certified Kubernetes Administrator CKA

Congratulations!

Upon passing the exam, you are now a Certified Kubernetes Administrator.

Be sure to add your badge to your LinkedIn, LFX and GitHub profiles. This will help you better connect with those in your community and also distinguish yourself as certified for future prospective employers.

What comes next?

After completing your CKA, you can pursue a [Certified Kubernetes Security Specialist \(CKS\)](#) as a next step.

Also consider training in additional topics including:

FREE

Introduction to Service Mesh with Linkerd LFS143

FREE

Introduction to Kubernetes on Edge with k3s LFS156

FREE

Introduction to Serverless on Kubernetes LFS157

NOTE: The courses above are NOT required or prerequisites to take this exam. This is only a suggested path of courses that may help you in preparing for the exam and your next step in your career.
